Debugging Contest

Event co-ordinators: Ansh Gupta, Sanket Dhage, Anamika Yadav

Faculty co-ordinators:

Event Description:

Are you a programming wizard with a knack for finding hidden bugs? Join our Debugging Challenge and put your skills to the test! In this exciting competition, you'll be tasked with identifying and fixing errors in a variety of code snippets. The clock is ticking, so think fast and code accurately to emerge as the ultimate debugger.

This contest is a great opportunity to showcase your problem-solving abilities, learn new debugging techniques, and connect with other coding enthusiasts. Whether you're a seasoned programmer or just starting out, this challenge is open to everyone. So, are you ready to take on the challenge and prove your coding prowess?

Contest Phase:

- Each participant receives the same set of 5-6 code snippets at the beginning of the contest.
- The maximum time allowed to complete all snippets is 30 minutes.

Rules:

Participation Requirements:

- Participants must register before the contest starts.
- All participants must use the specified programming languages (e.g., Python, JavaScript, etc.).
- No use of phones, internet, or external resources is allowed during the contest.
- Pen and paper will be provided to each participant to help with debugging and problem-solving.

Submission of Solutions:

- Participants must submit their solutions once they have completed all the snippets. Only one submission is allowed, so ensure the bugs are properly fixed before submitting.

Judging Criteria:

Points for Bugs Fixed:

- Each correctly fixed bug earns points based on its complexity:

Code Quality & Efficiency (Bonus Points):

- Participants can earn bonus points based on the quality and efficiency of their code:
- Clean, well-structured code: +5 points.
- Optimal use of resources (e.g., time complexity, space complexity): +5 points.
- Proper documentation and comments in the code: +3 points.

Time Taken (Tiebreaker):

- The time taken to submit the completed solution will be used in case of a tie. Faster participants will have an advantage if scores are tied.

- ❖ Simple bugs (syntax errors, basic logic flaws): 10 points per bug.
- ❖ Moderate bugs (loop conditions, function logic errors): 20 points per bug.
- ❖ Complex bugs (data structure issues, optimization flaws): 30 points per bug.

EMPOWERING INNOVATION THROUGH CREATIVITY
