Technical Treasure Hunt

Event Co-ordinators: Ansh Gupta, Rasika Shinde

Faculty Co-ordinator:

Event Description:

Join an exciting race that blends technology and adventure! Solve puzzles, crack codes, and tackle technical challenges in areas like coding, cybersecurity, and electronics. Compete against other teams to reach checkpoints, using your skills and teamwork to advance. The first team to complete all challenges wins the prize!

Are you ready for the challenge?

Contest Phase:

- Participants must form teams, with each team consisting of 3-5 members. All team members must stay together during the hunt.
- Teams must solve a series of technical challenges or puzzles to find clues that lead them to the next location or task.
- The ultimate goal is to reach the final destination or solve the final puzzle in the shortest time.

Rules:

- **Clue Distribution:** Clues or challenges are given at the start and at each subsequent location or checkpoint.
- Clues may involve solving technical problems, deciphering codes, or completing mini-projects.
- **Time Limit:** A specific time limit is set for completing the treasure hunt. If no team completes the hunt within the time limit, the team that has solved the most challenges or reached the furthest checkpoint wins.
- **Use of Technology:** Teams are allowed to use gadgets like smartphones, laptops, or any other devices approved by the organizers. Internet access may be restricted or allowed based on the nature of the challenges.
- **Prohibited Actions:** No tampering with clues or altering the setup. Teams must not interfere with other teams' progress. Collaboration between teams is not allowed unless specified.
- **Fair Play:** Teams must adhere to all rules of the event. Cheating, using shortcuts, or any form of dishonest behavior will result in immediate disqualification.

Judging Criteria:

The winner is determined based on the fastest completion time or the maximum number of correctly solved challenges. In case of a tie, additional tie-breaker challenges or puzzles
