

1. Basic Information

Event Name – Code Decode

Event Type – Technical

Event Duration – 22nd September @12pm – 1.30pm

Venue – Join WhatsApp group for more information

Event Coordinators :

- Vishal Moota | Contact: 9321863273 | Email: vishalmoota2005@gmail.com
- Anamika Yadav | Contact: 8425825513 | Email: anamika30251@gmail.com

2. Event Description –

“Code Decode – Voyage of the Pirates” is a technical coding event designed around an adventurous **pirates theme**. Participants will embark on a thrilling journey where they solve challenges step by step, just like unlocking hidden treasures. The event is structured into three progressive sets: MCQs to test fundamental knowledge, debugging and output prediction to sharpen analytical skills, and real coding problems to showcase problem-solving abilities.

The purpose of the event is to encourage students to enhance their coding, debugging, and logical thinking skills while experiencing a fun, competitive, and theme-based technical challenge.

3. Participation Guidelines

- **Eligibility** – Open to all students (all years, all branches).
- **Team Size** – Solo participation only.
- **Registration Process** – Online Google Form / On-spot registration.
- **Entry Fee** – 50 rupees

- **Prize –**

1st Prize : 600 rupees

2nd Prize : 300 rupees

- **Confirmation & Communication** – Updates will be shared through dedicated WhatsApp group.

4. Rules & Regulations

- **General Code of Conduct:**

Participants are expected to maintain proper discipline and respectful behaviour throughout the event. Any kind of cheating, malpractice, or misconduct will result in immediate disqualification.

- **Time Limits:**

- Set 1 (MCQs): 10 minutes
- Set 2 (Code Snippets & Debugging): 20 minutes
- Set 3 (Coding Problems): 30 minutes

- **Restrictions:**

- Personal laptops are not allowed unless special permission is given by the coordinators.
- Mobile phones must remain on silent mode and cannot be used for searching solutions or for communication during the event.
- The use of AI-based tools (such as ChatGPT, Copilot, or online compilers) is strictly restricted.
- All tasks must be completed individually on the computers provided in the lab.

➤ **Disqualification Criteria:**

Any participant found violating the rules, copying solutions, collaborating with others, or using unfair means will be disqualified immediately.

➤ **Safety Rules:**

Not applicable.

5. Event Structure & Flow

- **Number of Rounds :** One single round

- **Round Descriptions –**

- **Set 1 – “Map of Mysteries” (MCQs):** Basic CS and programming fundamentals.

Time : 10 minutes

- **Set 2 – “Fix the Broken Ship” (Code Snippets & Debugging):** Predict outputs and debug errors.

Time : 20 minutes

- **Set 3 – “Treasure Hunt Code” (Coding Problems):** Solve coding problems using logic and efficiency.

Time : 30 minutes

Flow of Activities –

- **(00:00 – 00:10) – Check-in & Seating:** Participants check in and are guided to their assigned systems.
- **(00:10 – 00:20) – Quick Briefing & Instructions:** Coordinators narrate the pirate-themed storyline, explain rules, and provide guidelines for the sets.
- **(00:20 – 00:30) – Set 1: “Map of Mysteries” (MCQs):** Participants solve multiple-choice questions to test programming and computer science fundamentals.
- **(00:30 – 00:50) – Set 2: “Fix the Broken Ship” (Code Snippets & Debugging):** Participants predict outputs and debug the given code snippets.

- **(00:50 – 01:20) – Set 3: “Treasure Hunt Code” (Coding Problems):** Participants attempt coding problems that unlock the “treasure”.
- **(01:20 – 01:30) – Final Submissions & Wrap-up:** Final answers are collected and verified; results are compiled.

6. Judging & Evaluation

- **Judging Criteria** – The event will be judged on Accuracy, Code Efficiency, and Logical Approach. Solutions must be correct, well-structured, and efficient.
- **Scoring Pattern** –
 - **Set 1 (MCQs):** 1 mark each.
 - **Set 2 (Debugging/Output Prediction):** 5 marks each.
 - **Set 3 (Coding Problems):** 20 marks each.
Scores will be cumulative across all sets.
- **Tie-Breaker Rules** – In case of equal scores, evaluation will be based on coding efficiency (time and space complexity) in Set 3.
- **Judges/Panel Details** – Event co-ordinators
- **Sample Score Sheet** – Not Applicable

7. List of Topics/Tasks/Challenges –

- **Set 1 (MCQs):** Programming basics, OOPs, data structures, algorithms, DBMS.
- **Set 2 (Debugging/Output Prediction):** C, Java, Python snippets with logical/semantic errors.
- **Set 3 (Coding Problems):** Problem-solving in C/Java/Python (searching, sorting, strings, arrays, logic-based).
