

1. Basic Information

Event Name – Pirates of the Query-Bean

Event Type – Technical

Event Duration – Start time: 3:00pm, End time: 5:00pm

Venue – 704 Lab

Event Coordinators –

- Omkar Mahadik | Contact: 8425842974 | Email: omkarmahadik180@gmail.com
- Valaya Dase | Contact: 9004422539 | Email: valayadase2005@gmail.com

2. Event Description –

"Pirates of the Query-Bean" is an innovative, pirate-themed technical event that challenges participants to solve a crime mystery. This event moves beyond traditional coding contests by casting participants as data detectives. Their mission is to solve a high-stakes case aboard a pirate ship by investigating a digital "crime scene"—a database filled with clues.

The event is designed to be highly inclusive, welcoming students from all academic years and skill levels. No prior knowledge of SQL is required, as each team will be provided with a "Captain's Logbook," a comprehensive guide with query templates. This ensures the true challenge is not coding expertise, but a test of teamwork, logical reasoning, and critical thinking. The true challenge lies in applying logical reasoning and critical thinking to follow a trail of evidence, making it a test of investigative strategy rather than coding expertise.

3. Participation Guidelines

- **Eligibility :** The event is open to all college students, including participants from other institutions.
- **Team Size :** A minimum of 2 and a maximum of 3 members per team.
- **Registration Process :** Registration will be conducted through both online (Google Forms) and offline (on-desk) modes. The registration fee is ₹90 per team.
- **Prizes :** Exciting rewards await! 🏆 The 1st Prize is ₹1200, and the 2nd Prize is ₹600.
- **Confirmation & Communication :** All registered teams will receive confirmation and subsequent event updates via a dedicated WhatsApp group.

4. Rules & Regulations

- **General Code of Conduct:** All participants are expected to maintain professional decorum. Any form of malpractice will lead to immediate disqualification.
- **Time limits:** The main investigation round will have a strict time limit of 35 minutes.
- **Restrictions:** Use of personal laptops is not permitted. Mobile phones must be kept on silent and are not to be used for searching for solutions or for any form of communication that provides an unfair advantage. The use of AI tools (e.g., ChatGPT) is strictly prohibited. All work must be done on the provided lab computers.
- **Disqualification Criteria:** Any team found violating the rules, indulging in plagiarism, or using unfair means will be immediately disqualified.

5. Event Structure & Flow

- **Number of Rounds** – The event consists of a single, comprehensive round.
- **Round Descriptions** –
 - **Objective:** To analyze the provided database and crime report, follow the clues using SQL queries, and be the first to solve the mystery by identifying the culprit, motive, and key evidence.
 - **Duration:** 35 minutes.
- **Flow of Activities** –
 - **(00:00 – 00:10) - Team Check-in & Seating:** Teams check in and are guided directly to their assigned PCs.
 - **(00:10 – 00:20) - Quick Briefing & Demo:** A concise narration of the story, rules, and a fast live demo of the software.
 - **(00:20 – 00:55) - The 35-Minute Detective Hunt:** The main investigation phase where teams work to solve the mystery.
 - **(00:55 – 01:00) - Final Submissions & Slot Wrap-up:** Final answers are verified, and the fastest times for the slot are recorded.

6. Judging & Evaluation

- **Judging Criteria** – The event is judged on **Speed** and **Accuracy**. The solution must be 100% correct, and the submitted 'Proof of Work' (SQL queries) must logically support the conclusion.
- **Scoring Pattern** – This is a speed-based event. The first three teams to submit the complete and correct solution will be declared the Winner, 1st Runner-Up, and 2nd Runner-Up.
- **Tie-Breaker Rules** – In the unlikely event of a tie, the judges will review the submitted queries for efficiency and clarity to make the final decision.

7. List of Topics/Tasks/Challenges –The challenge is a single, immersive mystery case. Participants will receive a digital "Detective's Kit" containing a crime report, a database

file (.db), and a guide book (.pdf). Their task is to perform data investigation using SQL queries to find hidden clues, follow a logical trail, and solve the case.
